12-Foot Propane Extension Hose

# PARTS SHOPPING LIST

## For Connecting Your BBQ Grill to Your RV's On-Board Propane Tank

Following is the list of parts needed to re-create our barbecue grill connection to our RV's on-board propane tank.

**NOTE:** If you'd like to purchase these items/parts online, visit our detailed post at <http://www.thervgeeks.com/propane/bbq-grill-connection/>, where you'll find links for everything listed below.

1 x Camco "Extend-A-Stay" 4-Port Brass Propane Tee w/12-foot Extension Hose

2 x 1"-20 Female Throatway Cylinder thread x 1/4" Male Pipe Thread Adapter

1 x 15psi Propane Regulator

1 x 1/4" NPT Brass Male-to-Male Nipple

2 x 1"-20 Male Throatway Cylinder thread x 1/4" Female Pipe Thread Adapter

1 x 1/4" Propane Quick Connector Female w/Shutoff Valve

1 x 1/4" Propane Quick Connector Male

1 x Yellow Gas/PTFE Tape (be sure to use yellow pipe tape for propane... about 4 or 5 wraps on each threaded connection)

### Optional:

1 x Camco 12' Propane Extension Hose (one 12' hose is included in the "Extend-A-Stay" kit, so only order this if you need more than 12' to reach your grill from your onboard propane tank)

1 x 1.5" Desk Hole Grommet (you'll only need this and a 1.5" hole saw if you're routing your hose through an exterior panel like we did)

If you are also interested in our Weber Q BBQ Grill, here's a list of the items needed to re-create our setup.

**NOTE:** This grill comes with a manual igniter button. Ours is a slight Frankenstein job, with electric ignition

- Weber Q1000 Portable Grill
- Rolling cart for Weber Q1000
- Cover for Weber Q1000
- Table Kit for Weber Q1000
